KYOCERA UNIVERSALDRIVER RELEASE NOTE

Kyocera *Classic* Universaldriver

PCL 5e/c / PCL 6/XL / KPDL

Driver Release Notes

Region: Europe

Supported Operating Systems:

OS	Version
Windows XP	32/64 bit
Windows Vista	32/64 bit
Windows 7	32/64 bit
Windows 8 / 8.1 *	32/64 bit
Windows Server 2003	32/64 bit
Windows Server 2008	32/64 bit
Windows Server 2008R2	64 bit
Windows Server 2012 *	64 bit
Windows Server 2012R2 *	64 bit

Supported Languages:

User interface	
Catalan	Italian
Dutch	Portuguese
English	Spanish
French	Swedish
German	

Microsoft WHQL Signed ("Certified"):
NO

Recommended installation method:
Using *Microsoft Add Printer Wizard* pointing to **OEMSETUP.INF** file in driver folder.

*) Attention if driver is NOT certified: Only after reboot into 'Disable driver signature enforcement' Windows Startup Option.

KYOCERA
Document Solutions

PCL 5e/c and KPDL

Implemented improvements and bug fixes:

Version 2.70

1. Auto-configuration – Community name and time-out will be saved
2. Auto-configuration – Cluster server updated
3. Added '@PJL SET USERNAME="..."'
4. 'Punch' feature for 1000 Sheet Finisher corrected
5. 'BiFold' feature for 4000 Sheet Finisher added
6. Changed string 'Broschüre' to 'Doppelheftung'
7. Help-files (De / En) corrected
8. 'OemSetup.inf' and 'KyXUni.ini' updated

Version 2.80

1. Auto-configuration – configuration of cassettes added
2. Auto-configuration – Community Name
3. Color handling improved

Version 2.81

1. String changed – 'Internal Finisher' to 'Int. Finisher / rear tray'
2. Output tray – bug fix for large TASKalfa

Version 2.82

1. eMPS Feature – Improved handling of server administrator/user name in client/server environment

Version 2.84

1. Auto Configuration – Cancel improved
2. Color Reproduction – 'Custom' – entry added for newer models
3. 'OemSetup.inf' – updated

Version 2.90

1. Added feature tab 'Publishing' for adding a Separation Page to a **copy collated** print job

KPDL only

2. Added feature 'Print Grays with Black Toner'
3. Added feature 'Color conversion' -> Speed or Quality priority
4. Solved bug using finishing options in addition with copy collate

PCL 5e/c only

5. Paper size A5 positioning problem corrected

Version 2.91

1. Fixed several bugs and translation issues of tab 'Publishing'

KPDL only

2. Fixed 'Time Stamp' of 'File name + Time stamp' of eMPS tab.

Version 2.92

1. 'OemSetup.inf' – updated with new models

Version 2.93

1. 'OemSetup.inf' – updated with new models

PCL 5e/c only

2. Word 2010 and newer: Refused 'Copy Collate by Programme' if no RAM/HDD is installed.
3. Added 'Orientation' – 'Rotated Portrait' and 'Rotated Landscape' if punch or staple is located on the wrong side.
4. Improve Letter (C)-Fold feature – folding every sheet added

KPDL only

5. Improved time stamp for eMPS and User Box.
6. Version No. corrected
7. Bug Configuration for Cassette 7 corrected

Version 2.94

1. 'ini' - file updated
2. Changed information retrieval of print port monitor

PCL 5e/c only

3. Improved time stamp for eMPS and User Box.

Version 2.94a

PCL 5e/c only

1. Corrected Custom Paper Size.

PCL 6 / XL

Implemented improvements and bug fixes:

Version 1.40

   1. Auto-configuration – Configuration of cassettes added
   2. Auto-configuration – Community name and time-out will be saved
   3. Auto-configuration – Button 'Übernehmen' changed to 'OK'

Version 1.41

   1. String change – 'Internal Finisher' to 'Int. Finisher / rear tray'
   2. Output tray – Bug fix for finisher of large TASKalfa

Version 1.42

   1. MS booklet feature – solved bug in landscape mode

Version 1.43

   1. eMPS Feature – Improved handling of server administrator/user name
      in client/server environment

Version 1.44

   1. Auto-configuration – Cancel button improved
   2. Color Reproduction – Custom entry added
   3. 'OemSetup.inf' – updated

Version 1.44a

   1. Cassette 6&7 – bug fixed

Version 1.50

   1. Added feature tab 'Publishing' for adding a Separation Page to a **copy collated** print job

Version 1.51

1. Fixed several bugs and translation issues of tab 'Publishing'.
2. Fixed bug of staple count.

Version 1.52

1. 'OemSetup.inf' – updated with new models

Version 1.53

1. Word 2010 and newer: Refused 'Copy Collate by Programme' if no RAM/HDD is installed.
2. Added 'Orientation' – 'Rotated Portrait' and 'Rotated Landscape' if punch or staple is located on the wrong side.
3. Improve Letter (C)-Fold feature – folding every sheet added

Version 1.54

1. 'ini' - file updated
2. Improved time stamp for eMPS and User Box.
3. Changed information retrieval of print port monitor

Version 1.54a

1. Corrected Custom Paper Size.
2. Corrected American envelope sizes.

General Known Issues:

1. Issue:
Collated copies will be put together as one booklet,
or will be stapled together,
or will not be jogged,
or will print only one separation page at the beginning of the print job.

Solution: The printer must have additional RAM disk or a HD disk drive installed. The driver must be set up as follows:
Properties -> Device Settings -> Collate: => Printer (RAM-Disk / HDD)

2. Issue: Using 'Job Retention' in client/server environment the administrator name will be send as standard instead of local (client) user name.

Solution: On server side the administrator must erase/empty the user name shown in the 'edit box' and click 'OK' and quit immediately afterwards. Now push the driver settings to the clients. The client driver will take the local user name now.

3. Issue: User name will not be sent or printed on the Separation page.

Solution: Open 'Printing Preferences…' and quit with 'OK' once.

4. Issue: Using 'Rotate Collate' to separate copies does not work and the printer shows an error.

Solution: The paper must be positioned in portrait in one cassette and in landscape in another cassette. Then the printer toggles between the cassettes for each set of copy.
This function does not work with large paper sizes like e.g. A3, Legal, etc.
This function is available for A3 (large paper size) printers only.

5. Issue: Collated print jobs (*PCL 5 e/c and PCL 6 / XL*)
Collated print jobs will not be collated or the printer shows an error message.

Solution: For older FS printer you need to activate a RAM disk or install a HDD for copy collate feature.
For some printers you must add RAM to be able to activate a RAM disk.
Set- up the print driver as follows:
Properties -> Device Settings -> Collate: => Printer (RAM-Disk / HDD)

6. Issue: The tab "Publishing" will not be shown in 'Printing Preferences'.

Solution: If you do not set-up the printer driver at installation time the tab "Publishing" will not be shown. You must open Printer Properties of the print driver and should add an option. Quit with OK. Now the tab Publishing will be shown.

7. Issue: The additional separation page will not be counted in the print spooler.

No solution: This is a known limitation. Please consider when using this feature together with accounting systems.

8. Issue: Some finisher options of KM-xxxx MFP model series will not be supported by the KYOCERA Universaldriver anymore.

Solution: Please use the KYOCERA driver provided together with these devices.

KYOCERA
Document Solutions

9. Issue: Colour (*PCL 6 / XL*) print-jobs will not be printed and / or the printer shows an error message.

No solution: Colour printer of the series FS-C50xxN and older will not be supported by the Classic Universaldriver PCL 6 / XL.
Please use KYOCERA KX driver provided together with these devices.

10. Issue: Error will be shown on printer side while using finishing option 'Booklet printing' – 'Left or Right edge binding'.

Solution: There are some settings which work against each other.
Please use following settings in addition for booklet printing:
In 'Printing Preferences' on tab 'Layout':
'Print on Both Sides:' set to 'None' (*no duplex printing*)
'Page Format' – 'Pages per Sheet' set to '1'
'Page Format' – 'Booklet' disable this setting
Click Button 'Advanced…' – 'Advanced Options' go to
'Paper/Output' and set 'Paper Size:' to standard 'A4' or 'Letter (*if US*)'

11. Issue: GDI (Host Based Printing) printers and MFPs are not supported.

Solution: Please use KYOCERA GX driver provided together with these devices.

KYOCERⱭ
Document Solutions

12. Issue: IrfanView forces the print driver to act as colour print driver, even if the print driver is set-up to monochrome as standard.

Solution: Open ini-file 'i_view32.ini' located in the following folder with a text-editor:
'C:\Users\'UserName'\AppData\Roaming\IrfanView\i_view32.ini'.
In the section '[Print]' search line 'Color=2' and replace it to 'Color=1'.
Save ini-file and restart IrfanView.

13. Issue: Microsoft Office 2010 and newer (Excel), if you want to print copies of one page (document).

Solution: In the print driver add a RAM-disk or HDD in 'Printer properties' – 'Extended Settings'. In 'Printer properties' – 'Device Settings' change 'Collate' from 'Programme' to 'Printer (RAM-Disk /HDD)'.
On printer side add a RAM disk if necessary.

14. Issue: Microsoft Office 2010 and newer, some print options are not available.

Solution: Please refer to the KB article ID 983069 of Microsoft. The new print dialog uses 'Print Tickets' which will not be filled in correctly by the Windows API. Use following macro to get the old print dialog w/o using 'Print Tickets':

```
Sub PrintDialog()
  Application.CommandBars.ExecuteMso("FilePrint")
End Sub
```
